

REPAIR PROCEDURE INSTRUCTION SHEET

Mohawk Touch Up Marker

The Mohawk Touch Up Marker is a valve type marker that contains finely ground light-fast pigments which seal, stain and finish - in one easy operation. Ideal for recoloring edges and scratches. Compatible with all types of finishes.

Shake marker thoroughly to get full color strength. Depress the nib to begin material flow. Do not overload the nib with material.

With light strokes, slowly apply color to the damaged area being careful not to "puddle" the material.

Gently feather the applied material with a finger to blend the color in with the surrounding area.

The damaged area will now be colored. If desired, this repair can be locked in using Mohawk Clear Lacquer in the appropriate sheen.
